

POP ON PBS AND ABC WITH JDR

U.S. population problems are spotlighted by two current network TV specials in which CPC has been much involved. • On November 29, the official two-hour television report to the public of the Commission on Population Growth and the American Future was telecast nationally by the Public Broadcasting Service, and a repeat this winter is probable.. On Saturday, January 6 from 10 to 11 pm, ABC will telecast its documentary "Population: Boom or Doom?", including coverage of the Bartlett-Yancey High School's (Yanceyville) family planning education program, developed with CPC support, and John D. Rockefeller 3rd's "Dialog on Population" with UNC students, sponsored by CPC when Mr. Rockefeller visited Chapel Hill this fall.
