Fewer Births
—Rockefeller

Chapel Hill (AP) — A recent report on population trends by Dr. John D. Rockefeller III, chairman of the U.S. Commission on Population Growth and the American Future, said that delayed childbearing and greater use of birth control methods would help considerably in meeting environmental needs. Rockefeller said the decreasing birth rate in the United States and many other countries was due mainly to economic factors and the availability of birth control methods.

Rockefeller: Population Control Is Essential

By DANIEL C. HOOVER

Chapel Hill — Population control is the most important problem facing the United States today, Dr. John D. Rockefeller III told the Carolina Population Association's leadership council in Chapel Hill today. Rockefeller said the U.S. Commission on Population Growth and the American Future, of which he is a member, has been studying the problem of overpopulation.

Rockefeller Says Population Dip Would Ease Environmental Ills

Chapel Hill, N.C. (AP) — John D. Rockefeller III, chairman of the U.S. Commission on Population Growth and the American Future, said a prompt reduction in population growth would help solve many of the country's environmental problems. Rockefeller said that a downward trend in population growth would be of great help in meeting environmental and social problems.

Low Population Growth Urged

Chapel Hill (AP) — Dr. John D. Rockefeller III, chairman of the U.S. Commission on Population Growth and the American Future, said that efforts to reduce the growth rate of the population would be of great help in solving many of the country's environmental and social problems.

Report On Pop Conference

At Chapel Hill — The U.S. Commission on Population Growth and the American Future, under the chairmanship of Dr. John D. Rockefeller III, has been studying the problem of overpopulation. The commission has concluded that the country's population is growing too fast and that prompt reduction in population growth would be of great help in solving many of the country's environmental and social problems.
