

# Fewer Births — Rockefeller

CHAPEL HILL (AP) — A prompt reduction in population growth would help considerably in meeting environmental and social problems of the nation, John D. Rockefeller 3rd, chairman of the U.S. Commission on Population Growth and the American Future, said today.

Rockefeller said that "stabilization of our population would contribute significantly to the nation's ability to solve its problems."

He urged a rethinking of American concepts of population growth with the Carolinian population.

Rockefeller and Sanford speak here

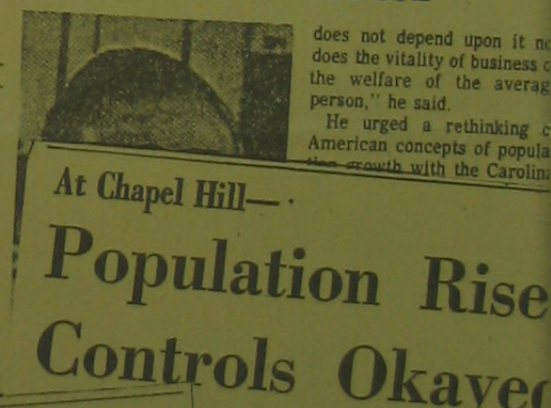

Business and professional leaders from throughout the State will meet in Chapel Hill today to explore ways that the trends and influences of population growth will affect the state.

## Rockefeller: Population Control Is Essential

By DANIEL C. HOOVER  
Staff Writer

CHAPEL HILL — Population control is the most important problem facing the United States today, John D. Rockefeller 3rd, chairman of the U.S. Commission on Population Growth and the American Future, was a featured speaker along with Duke University President Terry Sanford.

The dinner opened a three-day workshop.

At Chapel Hill—

## Population Rise Controls Okay

C. (AP) — John D. Rockefeller 3rd, chairman of the U.S. Commission on Population Growth and the American Future, said today that "stabilization of our population would contribute significantly to the nation's ability to solve its problems."

"Demands for government services will be less than they would otherwise be, and resources available to finance governmental activities greatly increased," Rockefeller said.

## Low Population Growth Urged

CHAPEL HILL (AP) — John D. Rockefeller 3rd, chairman of the U.S. Commission on Population Growth and the American Future, said today that "stabilization of our population would contribute significantly to the nation's ability to solve its problems."

## Sanford Calls For Control
