

HOW TO COMPLY WITH THE NIH PUBLIC ACCESS POLICY FOR A MANUSCRIPT

If this manuscript...

- Is not resulting from NIH funding to you and/or your co-author(s) —→ STOP you are DONE
- Was accepted for publication before April 7, 2008 —→ STOP you are DONE
- Was not submitted to a peer-reviewed journal —→ STOP you are DONE

If you can't be exempted above, comply with the steps below:

1. Address the copyright. First, check to see if the publisher provides blanket compliance with the policy. This should be noted as a term on the copyright transfer agreement. If they do comply, skip to step 3 below.
2. If the publisher does not automatically provide permission, do 2a or 2b, below:
 - 2a.** include the UNC cover letter
(<http://www.cpc.unc.edu/services/library/NIH%20Public%20Access%20Policy/UNCPublisherLtr.pdf>) when initially submitting your manuscript for review
 - 2b.** Wait for your manuscript to be accepted and then attach the Additional Term form (http://www.cpc.unc.edu/services/infoserv/library/nih_public_access_mandate/steps_to_comply_with_the_policy) with the copyright transfer agreement
3. Once you have the publisher's agreement, determine which version of your manuscript to submit and note their required embargo time. Consult http://www.cpc.unc.edu/services/infoserv/library/nih_public_access_mandate/journals for the policies for selected journals.
4. If you are affiliated with the Carolina Population Center (CPC) for this manuscript, the library staff at CPC will submit your accepted manuscript to PubMed Central for you. Send the library staff all of the following details:

Name and Email Address of Principal Investigator, Title of Journal, Title of Manuscript, NIH Grant Number(s), Copy of Signed Publisher/Author Agreement, Manuscript Files (In Word, Excel, PDF or other format), and Embargo Delay Time period

If you are not affiliated with CPC, you must submit your manuscript yourself or via other means at <http://www.nihms.nih.gov>.
5. Upon submission, PubMed Central will generate two numbers specific to your manuscript. An **NIHMSID** number is the temporary number and the **PMCID** number is the permanent number.
6. In the future, when citing this manuscript/paper in NIH proposals or progress reports, include the PMCID number. If the PMCID number isn't available, use the NIHMSID number.
