NIH Public Access Policy:
What You Need to Know and Do to Comply!

Lori Delaney
Carolina Population Center Library
University of North Carolina at Chapel Hill
October 20, 2008
Important dates

NIH proposals, progress reports and applications submitted after May 25, 2008 must include a PMCID for the citations authored by the PI/co-PI and for citations that result from their projects.

Articles *accepted for publication* on or after April 7, 2008 must be submitted to PubMed Central.
Applies to any article that

- Is peer-reviewed
- Arises from:
  - Direct funding from an NIH grant or cooperative agreement active in Fiscal Year 2008 or beyond, or;
  - Direct funding from an NIH contract signed on or after April 7, 2008, or;
  - Direct funding from the NIH Intramural Program, or;
  - NIH pays salary (or a portion of it).
How to comply

1. Address copyright
2. Submit manuscript to immediately upon acceptance for publication
3. Cite PMCID or NIHMSID

PubMed Central

Quantifying the urban environment: a scale measure of urbanicity outperforms the urban-rural dichotomy

Mr. Darren Lawrence Dahly, M.H.S. and Linda S Adair, Ph.D.
Author may request permission

Send UNC Cover Letter when submitting manuscript for review

Attach signed Additional Term and send with copyright transfer agreement that says “subject to Additional Term, attached.”

Final peer-reviewed manuscript

Final published article
Submitting to PMC

Some publishers submit manuscripts to PMC:
http://publicaccess.nih.gov/submit_process_journals.htm
Submitting to PMC

If publisher doesn’t submit, use NIH Manuscript Submission System (NIHMS)
http://www.nihms.nih.gov/
Library staff will submit for CPCers

Manuscript Submitter Service for CPC Researchers

CPC Library staff will submit manuscripts written by CPC fellows, staff, or trainees to PubMed Central. The manuscripts must meet the following criteria:

- Accepted for publication after April 7, 2008
- Accepted in a peer-reviewed journal
- Based on work that was funded by NIH in FY 2008 or beyond

In order for CPC Library staff to submit your manuscript, we will need the following information and materials:

- Principal investigator name and email address
- Title of the journal
- Title of manuscript
- Grant number(s)
- Confirmation (copy of signed publisher/authors agreement(s)) that you have copyright clearance to comply with the NIH Public Access Policy
- Manuscript files (Word, Excel, PowerPoint, TIFF, GIF, JPEG, PDF, etc.)
- Embargo/Delay time period (how long after publication can the journal article be made available in PMC as specified by the publisher; 12 months maximum embargo period as per NIH policy)

The NIH Public Access Policy requires that manuscripts must be deposited to PubMed Central immediately after the manuscript has been accepted for publication. As soon as possible after that, send the information listed above to CPC Library staff at cplib@unc.edu

Once the manuscript has been submitted to PubMed Central (via the NIH Manuscript Submission system) by CPC Library staff, the NIHMS will send an email to confirming the receipt of the manuscript and include a link to the submission for final approval. Manuscripts will not be posted to PMC without final approval from NIHMS.

If you have questions, contact CPC Library staff by visiting the library in 302 University Square East, e-mailing cplib@unc.edu, or phoning the reference desk at 962-3081.

Open access publishing

You will be pleased to hear that Springer journals are fully geared up for that requirement. **All you have to do is opt for open access publication** of your article through Springer's Open Choice…

“Publishing with PLoS, the open-access publisher of peer-reviewed scientific and medical research, is the simplest way to comply with the new law—we deposit your complete article into PubMed Central immediately upon publication, saving you substantial time and effort.

For those authors of primary research articles whose funding agency requires deposit of an article in an archive, Wiley offers the option of funded access. With this option, **the author pays a fee to ensure that the article is made available to non-subscribers** upon publication via Wiley InterScience, as well as delivered to the funding agency's preferred archive when applicable. This access option is available only to authors of primary research articles.
