

**The National Longitudinal Study of Adolescent to Adult Health (Add Health)  
Data Order Form**

Additional data are now available to Add Health contract researchers. To order these data, please fill out and return the following request form along with your file justification.

Name: \_\_\_\_\_ Contract #: \_\_\_\_\_

\_\_\_\_\_  
Signature of Investigator Date

Please check the requested files.

\_\_\_\_\_ **Narcotic Drug Flag**

This file contains a flag that identifies Wave IV respondents who report taking a medication that contains a narcotic.

\_\_\_\_\_ **Wave III Sex Ratio**

In this file are constructed variables at the county-level for sex ratios for males to females ages 18 to 29, 30-34, and 18 to 34, the proportion of males and females ages 18 to 34, and the sex ratio of employed males 16 years and older to the total number of females 16 years and older for the white population and the black or African American population.

\_\_\_\_\_ **BMI Genetic Risk Score**

This file contains the BMI genetic risk score for Add Health twin and full sibling respondents who provided saliva samples at Wave IV.

---

**Include a brief statement below explaining the necessity and relevance of each file to your research agenda.**
