Acknowledging the P2C & P30 Center Grants

What is the P2C center grant and who does it cover?

The P2C, or Population Dynamics Centers Research Infrastructure Program grant, provides support to advance the field of population dynamics research by increasing research impact, innovation, and productivity; developing junior scientists; and maximizing the efficiency of research support. The principle research areas of CPC's P2C are Sexuality, Reproduction, Fertility, and Families; Population, Health, and the Environment; and Inequality, Mobility, and Well-Being. CPC Fellows and Trainees who conduct PDB-relevant research are supported by the P2C grant (P2C HD050924) and should cite it.

What is the P30 center grant and who does it cover?

The P30 supports the Carolina Center for Population Aging and Health (CCPAH), which is one of NIA's 12 Centers on the Demography and Economics of Aging. The center supports the infrastructure and pilot data necessary for research and program development, focusing on our three principle research areas: Aging in Diverse Contexts, Understanding Links between Health and Social and Economic Productivity, and Measurement and Methods. Fellows, Trainees, and other CCPAH affiliates who conduct research in these areas are supported by the P30 grant (P30 AG066615) and should cite it.

Which CPC NIH center grant(s) should my manuscript cite?

- Use the CPC NIH Center Grants Flowchart: <https://go.unc.edu/flowchart>
- If unsure, send title and abstract to Lexie Groner for guidance.

NIH Compliance

Once your publication has been accepted, send the materials below to Lexie Groner so she can submit the manuscript to the NIH Manuscript Submission (NIHMS) System.

- Final accepted manuscript before journal formatting
- Title page with author affiliations, corresponding author contact information, and abstract
- Figures and tables
- Supplemental information or appendices

Use PMCID on NIH proposals, biosketches, and grant reports

Grant Numbers:
P2C HD050924
P30 AG066615
