Should My Manuscript Cite the P2C Center Grant (HD050924)?

Is it about people?  

- NO  
  - Does it develop a method or measurement technique that is relevant for population-related research?  
    - NO  
      - Do not cite  
    - YES  
      - Cite P2C  
  - YES  
    - What ages are included?  
      - Under 50  
      - Across the lifespan  
      - Over 50  
      - Does it include any of the following themes?  
        - Early learning  
        - Early exposures and later life outcomes  
        - Adolescent health  
        - Women’s health  
        - Health and disease over the life course  
        - Human health, productivity, and development  
        - HIV/AIDS  
        - Sexually transmitted infections  
        - Sleep  
        - Gene-environmental interactions  
        - Migration  
        - Racial disparities  
        - Themes:  
          - Inequality, Mobility, and Well-Being  
          - Population, Health, and Environment  
          - Sexuality, Reproduction, Fertility, and Families  
          - Population Dynamics and Composition  
          - Subtopics:  
            - Contraceptive behaviors  
            - Women’s reproductive health  
            - Men’s reproductive health  
            - Labor and delivery/obstetrics  
            - Breastfeeding  
        - Sample Acknowledgments: Research reported in this publication was supported by NICHD of the National Institutes of Health under award number P2C HD050924.
