

Summer 2025 Undergraduate Research Internship

Project Name

Carolina Demography

Faculty Mentor

Dr. Nathan Dollar (Director, Carolina Demography)

Project Description

This project will involve applied demographic analyses for North Carolina and its 100 counties and the development of interactive data tools the public can use to obtain demographic information about their communities.

Scope of Work for Internship

- Data compilation
- Data cleaning and analysis
- Data visualization

Expected Deliverables

Clean and analyze Census data for North Carolina and produce interactive data visualizations that will be used for public presentations and made publicly available on the Carolina Demography website.

Preferred Skills

Proficiency with Stata and Tableau preferred
